INTERNATIONAL JOURNAL OF PLASTICITY

Editor-in-Chief

Akhtar S. Khan
Professor & Director, Mechanical Engineering Department,
University of Maryland–Baltimore County,
Baltimore, MD 21228-5398, USA

Senior Editors

James F. Bell, Johns Hopkins University, USA

Nicolae Cristescu, University of Florida, USA

Editorial Advisory Board

Jacob Aboudi, Tel-Aviv University, Israel
Lallit Anand, Massachusetts Institute of Technology, USA
Satya N. Atluri, Georgia Institute of Technology, USA
Romesh C. Batra, University of Missouri–Rolla, USA
M. Berveiller, Université de Metz, France
Otto Bruhns, Ruhr-Universität Bochum, Germany
James Casey, University of California, Berkeley, USA
J. L. Chaboche, ONERA ORCE, France
Yannis Dafalias, University of California, Davis, USA
Cesare Davini, Università degli Studi di Udine, Italy
Paul Dawson, Cornell University, USA
Raj N. Dubey, University of Waterloo, Canada
George J. Dvorak, Rensselaer Polytechnic Institute, USA
Kerry S. Havner, North Carolina State University, USA
John Jonas, McGill University, Canada
Michal Kleiber, Polish Institute of Fundamental Technical Research, Poland
Erhard Krempl, Rensselaer Polytechnic Institute, USA
Stelios Kyriakides, University of Texas–Austin, USA
Torben Leffers, Riso National Laboratory, Denmark
David L. McDowell, Georgia Institute of Technology, USA
A. Molinari, Université de Metz, France
Ingo Müller, Technische Universität Berlin, Germany
Kenneth Neale, Université de Sherbrooke, Canada
Nobutada Ohno, Nagoya University, Japan
Piotr Perzyna, Polish Institute of Fundamental Technical Research, Poland
Yapa Rajapakse, Office of Naval Research, USA
Juan C. Simo, Stanford University, USA
Elmar Steck, Technische Universität Braunschweig, Germany
Michael G. Stout, Los Alamos National Laboratory, USA
Hiroshi Takahashi, Yamagata University, Japan
C. Teodosiu, Université Paris-Nord, France
Masataka Tokuda, Mie University, Japan
Robert Wagoner, The Ohio State University, USA
George J. Weng, Rutgers University, USA

Publishing, Subscription and Advertising Offices: Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, USA, INTERNET "PPI@PERGAMON.COM"; or Pergamon Press Ltd., Headington Hill Hall, Oxford OX3 0BW, England.

Published 8 per annum. *Annual Institutional Subscription Rate* (1993): £368.00 (US$699.00). *Personal Subscription Rate* for those whose library subscribes at the regular rate (1993): £65.00 ($124.00). Sterling prices are definitive. US dollar prices are quoted for convenience only, and are subject to exchange rate fluctuation. Prices include postage and insurance and are subject to change without notice.

INTERNATIONAL JOURNAL OF PLASTICITY

Volume 8, Number 1 1992

CONTENTS

Erwin Stein **Genbao Zhang** **Jan A. König**	1	Shakedown with nonlinear strain-hardening including structural computation using finite element method
Massimiliano Lucchesi **Andrea Pagni**	33	Hadamard–V. Mises ideally plastic materials
G. Cailletaud	55	A micromechanical approach to inelastic behaviour of metals
Dai-Heng Chen **Hironobu Nisitani**	75	Analysis of elastic–plastic problems based on the principle of superposition: I. Basic theory
Tasnim Hassan **Stelios Kyriakides**	91	Ratcheting in cyclic plasticity, Part I: Uniaxial behavior

Volume 8, Number 2 1992

CONTENTS

Tasnim Hassan **Edmundo Corona** **Stelios Kyriakides**	117	Ratcheting in cyclic plasticity, Part II: Multiaxial behavior
H. Schlums **E.A. Steck**	147	Description of cyclic deformation processes with a stochastic model for inelastic behaviour of metals
T. Inoue **D.Y. Ju**	161	Simulation of solidification and viscoplastic stresses during vertical semicontinuous direct chill casting of aluminum alloy
J.A. Nemes **J. Eftis**	185	Pressure-shear waves and spall fracture described by a viscoplastic-damage constitutive model

Volume 8, Number 3 1992

CONTENTS

Akhtar S. Khan **Ying Xiang** **Sujian Huang**	209	Behavior of Berea sandstone under confining pressure, Part II: Elastic–plastic response
M. Klisinski **Z. Mroz** **K. Runesson**	221	Structure of constitutive equations in plasticity for different choices of state and control variables
Dai-Heng Chen **Hironobu Nisitani**	245	Analysis of elastic–plastic problems based on the principle of superposition, Part II: Elastic–plastic analysis of an infinite plate with an elliptic hole or a crack
George Z. Voyiadjis **Peter J. Kattan**	271	Finite elasto-plastic analysis of torsion problems using different spin tensors
X.-P. Xu **A. Needleman**	315	The influence of nucleation criterion on shear localization in rate-sensitive porous plastic solids

Volume 8, Number 4 1992

CONTENTS

O.T. Bruhns **T. Lehmann** **A. Pape**	331	On the description of transient cyclic hardening behaviour of mild steel CK 15
M.K. Duszek **P. Perzyna** **E. Stein**	361	Adiabatic shear band localization in elastic–plastic damaged solids
K.R. Rajagopal **A.S. Wineman**	385	A constitutive equation for nonlinear solids which undergo deformation induced microstructural changes
Akhtar S. Khan **Sujian Huang**	397	Experimental and theoretical study of mechanical behavior of 1100 aluminum in the strain rate. range 10^{-5}–10^{4} s^{-1}

R.C. Batra
C.H. Kim 425 Analysis of shear banding in twelve materials

Kwansoo Chung
Kirit Shah 453 Finite element simulation of sheet metal forming for planar anisotropic metals

F. Havlíček
M. Tokuda
S. Hino
J. Kratochvíl 477 Finite element method analysis of micro-macro transition in polycrystalline plasticity

---

Volume 8, Number 5 1992

CONTENTS

S. Huang
A.S. Khan 501 Modeling the mechanical behavior of 1100-0 aluminum at different strain rates by the Bodner–Partom model

Mehrdad Negahban
Alan S. Wineman 519 The evolution of anisotropies in the elastic response of an elastic–plastic material

Y.K. Lee 543 Shear banding and material instability in finitely deformed compressible materials: An example in thin sheets

H. Lippmann 567 The effect of a temperature cycle on the stress distribution in a shrink fit

T.W. Wright 583 Shear band susceptibility: Work hardening materials

S. Pycko
J.A. König 603 Properties of elastic–plastic structures subjected to variable repeated imposed displacements and mechanical loads

---

Volume 8, Number 6 1992

CONTENTS

H.M. Zbib
J.S. Jubran 619 Dynamic shear banding: A three-dimensional analysis

Wei Yang
Li Cheng
Keh-chih Hwang 643 Objective corotational rates and shear oscillation

J.W. Walter 657 Numerical experiments on adiabatic shear band formation in one dimension

David L. McDowell 695 A nonlinear kinematic hardening theory for cyclic thermoplasticity and thermoviscoplasticity

N.K. Gupta
A. Meyers 729 Considerations of translated stress deviators in describing yield surfaces

Alberto Taliercio 741 Lower and upper bounds to the macroscopic strength domain of a fiber-reinforced composite material

---

Volume 8, Number 7 1992

CONTENTS

M. Darrieulat
R. Fortunier
F. Montheillet 763 Invariant formulation of anisotropic plastic behaviour in the case of cubic symmetry

E. Van der Giessen
P.D. Wu
K.W. Neale 773 On the effect of plastic spin on large strain elastic–plastic torsion of solid bars

P. Haupt
M. Kamlah
Ch. Tsakmakis 803 Continuous representation of hardening properties in cyclic plasticity

Boris Druyanov
Sergey Alexandrov 819 Laws of external friction of plastic bodies

J. Kamenjarzh
D. Weichert 827 On kinematic upper bounds for the safety factor in shakedown theory

Zaiqian Hu
Edgar Fernand Rauch
Cristian Teodosiu 839 Work-hardening behaviour of mild steel under stress reversal at large strains

M. Berveiller
A. Naddari
N. Fakri
A. Korbel 857 The role of shear bands in the evolution of copper texture

Yehia A. Bahei-El-Din 867 Uniform fields, yielding, and thermal hardening in fibrous composite laminates

---

Volume 8, Number 8 1992

CONTENTS

N. Bontcheva
S. Todorov 893 Numerical investigation of plastic localization bands in aluminium rings subjected to static axial compression

Li-zhi Sun
Zhu-ping Huang 903 Dynamic void growth in rate-sensitive plastic solids

W. Trampczyński
Z. Mróz 925 Anisotropic hardening model and its application to cyclic loading

K. Ishikawa
S. Tanimura 947 Strain rate sensitivity of flow stress at low temperatures in 304N stainless steel

Krzysztof Wilmanski 959 Macroscopic theory of evolution of deformation textures

J. Betten
C.H. Shin 977 Inelastic analysis of plastic compressible materials using the viscoplastic model

I Volume Contents and Author Index
